

Tongue & Groove Modulares

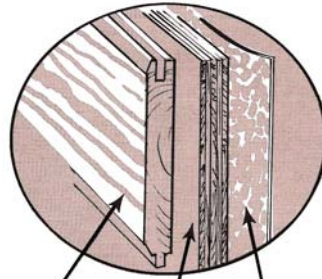

We provide the unfinished 3/4" tongue and groove face which is bonded to 3/4" plywood and backed by 26 gauge galvanized steel. These panels fit inside a 2" square, 14 gauge tubing. Dividers are available with bar top or solid top.

3/4" square bars are standard, other bars are available.

stalls are 8' tall

2/3 bar top T/G end wall-front shown with carousel feeder

Shown with swing top, carousel feeder & tack box

Laminated Modulares

These Port-A-Stall panels are made with baked enamel aluminum outer layer, bonded to 3/4" plywood for insulation and shock absorbancy, bonded to 26 gauge galvanized inner layer for strength and resiliency. Different face material is also available. Shown with an optional feeder door which eliminates the need to enter stall for feeding. Dividers are available with bar top or solid top. Fronts are available with one piece sliding, one piece swing or dutch doors. 3/4" square bars are standard, other bars are available.

stalls are 7' 4 1/2" tall
